[illegible]

The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight, wherever the shipping weight for the ore itself or other component is less than the gross weight of the ore. There may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

UNITED STATES GENERAL IMPORTS OF MERCHANDISE
SEPTEMBER 1945[illegible]

The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such cases, these minor components are reported under their respective commodity numbers without a shipping weight, whenever the shipping weight for the chief component has been entered only to the chief component. For example, the shipping weight for a shipment of 100,000 pounds of 100 percent iron ore, consisting of 90,000 pounds of iron ore and 10,000 pounds of minor components, would be reported as follows:

The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. However, the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions (like reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transaction.

1. The shipping weight may include that of other components of the ore when this ore is composed of two or more components. In such cases, these other components are reported under their respective commodity numbers without a shipping weight, whenever the shipping weight for the ore from a given country is less than the weight of the ore, there may have been transnational duty reflected in the gross weight totals but for which the shipping weight has been assigned only to the total component of the transnational.

UNITED STATES GENERAL IMPORTS OF MERCHANDISE
SEPTEMBER 1945

[illegible]

the shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. However the shipping weight for the ore from a given fraction is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transaction.

UNITED STATES GENERAL IMPORTS OF MERCHANDISE
SEPTEMBER 1945

[illegible]

The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. However the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of transactions.
